

BASKETBALL HOOPS

The following basketball specifications regard the installation of basketball equipment within the community:

1. Basketball backboards shall not be installed structurally on a building or structure (they must be pole mounted).
2. Backboards must be professionally manufactured, of neutral color (clear, white, gray, or tan) and free of brightly colored decals or graphics.
3. Poles and support brackets must be painted black or to match the body color of the home.
4. All equipment including poles, support brackets and netting shall be maintained in good condition. Broken equipment, including backboards, bent poles, supports, rims and netting and peeled or chipped paint are prohibited. Netting is Limited to nylon or similar cord netting. Metal or other chain nets are prohibited.
5. Spotlights or other lighting for the purpose of illuminating the area of play for use after sunset the light must be contained on the property.
6. The owner of the home is fully responsible for ball containment on their individual property. Painting of the driveway for a basketball court layout or any other purpose is prohibited.
7. Rear yard basketball backboard installations must conform to all of the above specifications.
8. Temporary or Portable basketball goals must be maintained in good condition. Placement of the goals must be on either side of the driveway no more than 50% of the distance from the house/garage to the inside edge of the street. Goals are not to be placed facing the sidewalks or streets.

Any basketball hoop that follows the above regulations does not need Architectural Approval prior to installation.
